

MAGNESIUM NITRATE

Magnesium Nitrate

Greenhouse Grade

9.3% Mg

GUARANTEED MINIMUM ANALYSIS:

Magnesium (Mg):9.3 %
Nitrate Nitrogen..... 10.7 %

For agricultural use only.

DIRECTIONS FOR USE:

This fertilizer is intended to assist in the production of various greenhouse and field crops requiring the nutrients listed on this label. This product requires dilution with clean water before feeding to plants, and should be used as part of a complete fertilizer program.

Without Injector: If mixing final feed strength (no ratio injector) add between 0.25-0.35 **grams** of this product to every litre of clean water.

With Injector: If using a 1:100 ratio injector, add 25 to 35 **grams** of this product to every litre of clean water in the concentrate tank. **For example**, if you have a 1000 L (1 m³) concentrate tank with a 1:100 ratio

fertilizer injector, add 25 to 35 **kg** of this product to the concentrate tank. When concentrating fertilizer solutions, care must be taken to follow general rules of compatibility.

The fertilizer rate must also take into consideration nutrients delivered by all other fertilizer fed in combination with this one in order to avoid overdosing any elements.

We advise you to seek the assistance of a fertilizer specialist, combined with frequent soil or drain water tests, to determine the correct amount of this product to use at any specific point of your crops maturity with the fertigation equipment on your farm/greenhouse.

FIRST AID:

IF IN EYES: Flush with plenty of water for 20 minutes. If irritation develops or persists, seek medical attention immediately.

IF ON SKIN: Wash with soap and water.
IF SWALLOWED: If large quantities

of this material are swallowed, call a physician immediately. DO NOT induce vomiting unless directed to do so by a physician. Never give anything by mouth to an unconscious person. IF INHALED: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Protect from exposure to extremes of temperature during storage. For additional information, see the Material Safety Data Sheet.
