## Directions for Commercial Use:

Calcium Dextro-Lac is a liquid fertilizer intended for foliar use. It should be used as part of a complete fertilizer program. Plants will require additional sources of major and possibly secondary and minor nutrients. A leaf tissue or soil test should be taken before use. The rate of application depends on soil type and intended crop. Typical rates are 2 to 8 litres/acre with sufficient water for thorough coverage. For best results, spray in the early morning or late afternoon. Do not apply during the "sunlight" hours when air temperature is above 30°C. For commercial use only. Seek the advice of an agronomist prior to use.

## Mixing Instructions:

Shake well prior to use. Fill application tank half full of water and slowly add product while agitating and continue filling tank. Apply product immediately following mixing and agitate while applying product. Jar test before mixing with other products.

## First Aid:

**IF IN EYES:** flush eyes with plenty of water for at least 15 minutes, lifting the upper and lower eyelids occasionally. If irritation develops or persists, seek medical advice for treatment.

**IF ON SKIN:** in case of irritation, remove clothing. Wipe excess from skin and wash with warm, soapy water for at least 5 minutes. If irritation develops or persists, seek medical advice for treatment.

**IF INGESTED:** induce vomiting. Never give anything by mouth (oral) to an unconscious person. If irritation develops or persists, seek medical attention immediately

**IF INHALED:** remove person to fresh air. Get medical attention for any breathing difficulty.

**Guaranteed Minimum Analysis:**  
**Calcium (Ca) 7.0%**
