

## 11-52-0

MAP (Monoammonium Phosphate)

### GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N) .....	11.00 %
Available Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> ).....	52.00 %
Molybdenum (Mo) .....	0.005 %

### FEATURES

- Very high in phosphorus
- Contains molybdenum

### BENEFITS:

Monoammonium phosphate (MAP) is a widely used source of phosphorus (P) and nitrogen (N). It's made of two ingredients common in the fertilizer industry and contains the most phosphorus of any common solid fertilizer.

### DIRECTIONS:

Rates may vary depending on soil types, crop history and rain fall. The following rates are based on application in the Fraser Valley. When a soil test is lacking, use the following rates:

### APPLICATION RATES:

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

This product is not hazardous under OSHA Hazard

Communication Standard (29 CFR 1910.1200).

### CAUTION:

Application of fertilizer material containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals. Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>
