

INTRODUCTION

Calcium is an essential plant nutrient that performs many important roles, including promoting proper plant cell elongation and strengthening cell wall structure.

BioFert Cal-O is formulated through a natural chelation process that makes it a unique product designed to meet your crops' immediate calcium and boron needs. Cal-O's calcium increases strength and structure of fruit and berries and the plant cell wall as a whole, while the added boron helps in fruit and seed development. Cal-O is organic and chloride free.

NUTRIENTS	Value	SIZES	SKU
Calcium (Ca)	4.00 %	20 L	BF1892256
Boron (B)	0.02 %	1000 L	BF1892252

PRODUCT CHARACTERISTICS		
Appearance	pH	Specific Gravity
transparent, amber coloured liquid	5.0 - 5.5	1.12 g/mL

DIRECTIONS FOR USE

Stir or shake well before use.

APPLICATION RATES

Foliar/Overhead: 4-12 L/acre, depending on crop. Use 2 - 4 times during the season.

BENEFITS

- Source of calcium and boron.
- Free of chlorides.
- Improves plant health and quality/shelf life of produce.
- Can be applied at all critical growing stages.
- Builds stronger plants to deal with different kind of environmental stresses.
