

### INTRODUCTION

Iron is a micro-nutrient all plants need to function. The most common symptom of iron deficiency is leaf chlorosis that begins from the new growth and eventually works its way to the older leaves. BioFert's **Essential Iron** is recommended to a wide range of crops, including field crops, ornamentals, turf, vegetables, and fruits trees to correct iron deficiency.

NUTRIENTS	Value	SIZES	SKU
Soluble Potash (K <sub>2</sub> O)	3.00 %	20 L	BF1891566
Sulphur (S)	2.50 %	1000 L	BF1891562
Iron (Fe)	3.00 %		

PRODUCT CHARACTERISTICS		
Appearance	pH	Specific Gravity
pale greenish liquid	1.60	1.18 g/mL

### DIRECTIONS FOR USE

Stir or shake well before use.

CAUTION: Product may cause staining on concrete, masonry, walls, fences, and other non-plant surfaces.

### APPLICATION RATES

**Garden Plants, Nursery, Houseplants:** Apply foliar at 7.5 mL/ L with a fine mist, wetting the leaves.

**Tree Crops:** Apply foliar at 2 L per acre with a fine mist, wetting the leaves.

**Lawn, Turf, Greens & Tees:** Use up to 150 mL per 1000 sq. ft at the rate of 10 mL / L of water.

### BENEFITS

- Can be used to correct iron chlorosis or deficiencies in plants.
- Also a source of sulphur and potash.
- Helps to maintain healthy and green leaves.
