

INTRODUCTION

Essential Micro is a liquid foliar fertilizer which is enriched with all essential micro-nutrients, as well as potassium, magnesium and sulphur for plant growth. Essential Micro should be used as a supplement to an adequate and balanced soil fertility program.

NUTRIENTS	Value
Soluble Potash (K ₂ O)	1.000 %
Magnesium (Mg)	0.500 %
Sulphur (S)	2.000 %
Manganese (Mn)	1.550 %
Copper (Cu)	0.250 %
Molybdenum (Mo)	0.022 %
Boron (B)	0.600 %
Zinc (Zn)	0.100 %

SIZES	SKU
20 L	BF1891446
1000 L	BF1891442

PRODUCT CHARACTERISTICS		
Appearance	pH	Specific Gravity
pale blue-green liquid	2.4	1.16 g/mL

DIRECTIONS FOR USE

Stir or shake well before use. Essential Micros is compatible with most pesticides, growth regulators and liquid fertilizers. However, a jar test protocol must be followed prior mixing. Note: Do not do foliar applications of Essential Micro under poor drying conditions or in excess heat. Always use enough water for a uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets.

APPLICATION RATES

Foliar: Apply 0.5 to 1 L/acre after active vegetative growth begins and prior to bloom. Dilute in minimum of 50 L of water per acre. Not recommended on fresh market grapes and berries after fruit formation.

Potting Plants: Mix 10mL in 4 L of water and apply to each 1 m² (10 sq.ft.).

BENEFITS:

- Prevents and corrects the micro-nutrient deficiencies that may hinder crop growth and yield.
- Allows a plant to become more resistant to pests and disease.
- Suitable for any crops.
