

Hi-N

11-0-5

BioFert®

BioFert Hi-N 11-0-5 is a granular homogenized fertilizer that is certified organic and 100% plant-based. Through a special fermentation process the organic materials are converted into an excellent soil builder fertilizer that supports the soil life efficiently and increases crops' abiotic stress tolerance.

Fast results, without losing steam!

Because of the ideal balance between slow and quick released nitrogen elements, effect is ensured up to several weeks. This means that approximately 50% of the nitrogen is released during the first four weeks, which gives results FAST, while the remaining nitrogen feeds the plants throughout the season without leaching into the ground.

The high level of trace elements and sugars supports a healthy soil life and provides healthy plant growth. The amino acids in Hi-N 11-0-5 can also be absorbed at low temperatures.

Hi-N 11-0-5 is always free of preservatives, and its round shape guarantees a good flowability on the land, with little to no dust during application. The product's naturally sourced raw materials contain trace elements and sugars support a healthy soil life and provide overall plant growth.

NUTRIENTS	Value
Total Nitrogen (N)	11.00 %
Soluble Potash (K ₂ O)	5.00 %
Calcium (Ca)	1.30 %
Sulphur (S)	3.70 %
Amino Acids	9.20 %

SIZES	SKU
25 kg	BF7603473
900 kg	BF7603472

ABOUT BIOFERT

BioFert is the organic division of TerraLink, a Canadian company with nearly 50 years of successful agriculture experience. We manufacture and distribute a full range of certified organic crop inputs such as fertilizers, crop protection and more. With locations in BC and AB, we are ready to serve you, wherever you are.

BENEFITS

- Easily applied with spreader
- Fully plant based
- Fast and slow release nitrogen
- Supports the soil life
- Efficient use of minerals
- Increases abiotic stress tolerance
