

## INTRODUCTION

**Humik** is a liquid humic acid ideal for soil/medium application. It supplies 12% humic acids and is enriched with vital primary nutrients and micronutrients through our proprietary fermentation process. Humik applied is immediately available for plant uptake. It acts as “glue” for soil particles which improves aggregation, thereby helping reduce erosion and nutrient leaching. Humik helps improve the cation exchange capacity (CEC) of soil up to 500-600 meg/100 gm (5 x greater than peat soil), and it encourages microbial activity in the soil.

NUTRIENTS	Value	SIZES	SKU
Soluble Potash (K <sub>2</sub> O)	2.50 %	20 L	BF1890966
		1000 L	BF1890962

PRODUCT CHARACTERISTICS		
Appearance	pH	Specific Gravity
brown-black liquid	9.6	1.06 g/mL

## DIRECTIONS FOR USE

Stir or shake well before use. Do not freeze. Humik should only be used in root zone through drip or drench. For maximum benefits, use sufficient water for good coverage.

## APPLICATION RATES

**Drip & Drench:** Use 10 - 20 L/acre.

**Foliar:** Use 4 - 8 L/acre

**Greenhouse:** 1.5 to 3.5 EC depending on need

## BENEFITS

- Improves physical soil properties
- Increases soil microbial activities
- Increases nutrient uptake by plants
