

INTRODUCTION

BioFert Organic Pre-Mix 6-2-0 is designed to pre-charge soil based and soilless mixes with Nitrogen, Phosphorous and other minerals essential for plant growth. For best results, use Organic Pre-Mix in conjunction with a liquid NPK fertilizer for ongoing nutrient needs.

NUTRIENTS	Value
Total Nitrogen (N)	6.00 %
Available Phosphoric Acid (P ₂ O ₅)	2.00 %
Calcium (Ca)	5.00 %
Magnesium (Mg)	1.00 %

SIZES	SKU
25 kg	BF7603013
1000 kg	BF7603012

PRODUCT CHARACTERISTICS	
<i>Appearance</i>	<i>Bulk Density</i>
granules	45 lb/ft ³

APPLICATION RATES:

Medium Mix: For best results use 10 - 15 kg per m³ and age mix for 2 - 3 weeks if possible. Keep soil mix moist.

For use in soil: use 0.75 - 1 kg per 9 m² (100 ft²) of growing space. For short term crops, use higher dose; use lower dose for long term crops. If medium contains compost and other nutrients, minimize Organic Pre-Mix to maintain an EC of 1.25 -1.5 mS/cm.

Top Dress: Use 2 - 4 gm per 4.55L (1 gal.) of soil volume every 3 - 5 weeks based on soil EC and incorporate into soil. After planting, use 10 - 12 g per plant around root zone and mix in well.

BENEFITS

- High quality natural sources of nitrogen, phosphorus and calcium required for early plant growth.
