EarthLink BerryMax B PLUS is an organic-based drip/drench fertilizer especially designed for all berry crops including blueberries, raspberries, strawberries, cranberries, gooseberries, elderberries and grapes. BerryMax B PLUS stimulates root and shoot development and overall plant growth in both early and late varieties. It also prepares the plant for more bud formation. It not only provides nutrients but also adds organic matter to soil.

DIRECTIONS FOR USE:

EarthLink BerryMax B PLUS is recommended for use from vegetative to early fruit formation stages. It can be used along with EarthLink BerryMax A PLUS based on soil conditions. Use sufficient water to soak soil well. For best results, use EarthLink BerryMax B PLUS 2 - 3 times a season.

Drip/Drench: Shake well before use. Apply 10-12 L/ha (4-5 L/acre).
