

Low N Blend

8-24-24

GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N)	8.00 %
Available Phosphoric Acid (P2O5)...	24.00 %
Soluble Potash (K2O).....	24.00 %
Sulphur (S).....	3.00 %

FEATURES

The 1:3:3 ratio works well for many different types of situations. There are no micronutrients in this blend so it is relatively safe for a number of crops.

DIRECTIONS:

These rates represent the needs of a medium textured soil. Heavy or muck soils may require less fertilizer. A lighter soil would possibly need an additional sidedressing of nitrogen. It is strongly recommended that the producer conduct tissue and soil tests. Fertilizer application should be adjusted accordingly to avoid excessive build-up or deficiencies of one or more nutrients.

All rates are in pounds per acre.

APPLICATION RATES:

Beans: 400 lbs pre-plant incorporated

Carrots: 750 lbs pre-plant incorporated

Cucumbers/Squash: 400-500 lbs pre-plant incorporated (+46-0-0 @ 100 lbs when vines start to grow)

Onions: 600 lbs pre-plant incorporated

Peas: 300 lbs pre-plant incorporated (see also 5-20-27)

Radish: 600 lbs pre-plant incorporated

Potatoes: 600 lbs pre-plant incorporated muck soils; 800 lbs pre-plant incorporated mineral soils.

CAUTION:

Do not use on container stock or in greenhouse production. This is not a label; these guidelines are based on the experiences of producers in the Fraser Valley. Always refer to soil test results before use.
