Science-Driven NutritionSM

Directions for Commercial Use:

Foliar: Apply 1 to 4 quarts per acre with sufficient water for thorough coverage. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops. For best results spray in early morning or late afternoon. Do not apply during the “sunlight” hours when air temperature is above 85°F. Ground: Apply 2 to 4 quarts per acre. Ground application can be via conventional ground sprayer or metered through irrigation. If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product.

Guaranteed Analysis:

Manganese (Mn) 5.0%

Water Soluble Manganese (Mn) 100%

Derived from
Manganese Carbonate
