

15-5-30

Hi-K Standard Prill

GUARANTEED MINIMUM ANALYSIS:

Total Nitrogen (N)	15.00 %
Available Phosphoric Acid (P ₂ O ₅)	5.00 %
Soluble Potash (K ₂ O)	30.00 %
Sulphur (S)	4.00 %

APPLICATION RATES:

To supply 1.0 lbs N / 1000 sq.ft apply product at 3.2 lbs / 1000 sq.ft.

Ideally apply at half rate twice at 90 degrees.

FEATURES:

Nitrogen:	5.25 % Ammoniacal Nitrogen 9.75 % Stabilized Nitrogen
Phosphorus:	Mono-Ammonium Phosphate
Potassium:	Muriate of Potash
Sulphur:	Ammonium Sulphate

BENEFITS:

15-5-30 "Hi-K" is a standard-sized (240 SGN) blended fertilizer that contains slow release nitrogen. This premium grade fertilizer is designed for use on golf courses fairways / roughs, sports fields and residential lawns. Typically used in late summer months and into the fall; can be used as a dormant winter feed. Contains 65% Controlled Release Nitrogen (CRN) from stabilized nitrogen sources. CRN minimizes surge growth and prolongs green up response for up to 10 weeks. CRN also reduces the incidence of nitrogen loss to the atmosphere via volatilization and nitrate leaching to ground water. 15-5-30 works well in soils that have a high CEC like clay soils. Can be used to amend low potassium levels in soils. Soluble nitrogen from ammonium sulphate adds sulphur and is more available to plants in cool fall conditions.
