

# 0-0-6 Sodium Buster

## Greens Grade Micro Prill

**GUARANTEED MINIMUM ANALYSIS:**

Soluble Potash (K <sub>2</sub> O) .....	6.00 %
Calcium (Ca).....	16.00 %
Magnesium (Mg) .....	2.80 %
Sulphur (S).....	18.60 %

**APPLICATION RATES:**

Apply product as needed based on soil tests from 5-10 lbs per 1,000 sq.ft.

Ideally apply at half rate twice at a 90 degree angle.

**BENEFITS:**

0-0-6 Sodium Buster is a micro-sized (90 SGN) single nutrient fertilizer. A premium grade fertilizer designed for use on closely mowed turf grass such as golf course greens and tees. Its small particle size provides even distribution of nutrients. 0-0-6 (Sodium Buster) contains calcium, magnesium and potassium sources which when applied increase levels of vital nutrients which are important for overall cell structure and chlorophyll production. When applied these cations essential remove unwanted sodium (Na) which can build up in soils from irrigation water. The atomic weight of Ca, Mg and K are higher than Na. Essentially these beneficial nutrients remove sodium from the cation exchange sites (CEC) in soils. Can be used in conjunction with soil penetrants which help move unwanted Na through the soil profile.
